

LexisNexis® Accurint® Real-Time Phones Search

Locate hard-to-find individuals.

Access more comprehensive real-time phone information, including over 200 million wireless numbers.

The LexisNexis® Accurint® Real-Time Phones Search will help you locate hard-to-find individuals using phone number, address and other simple queries. This search provides detailed information on current and previous carriers that can be used for investigative purposes. In addition, users can also run batch files for quick processing of a large amount of records.

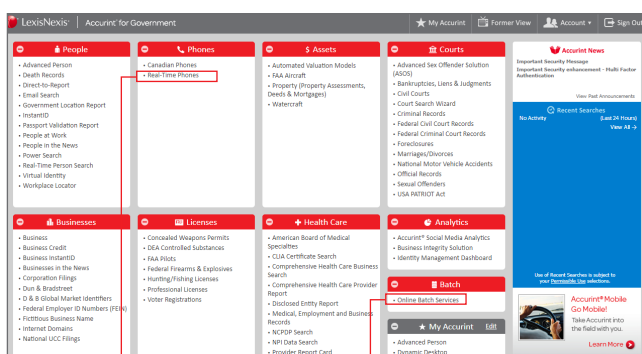

Real-Time Phones Search can help your agency generate investigative leads and improve the investigation process by:

- Finding up-to-date consumer or business identifying information tied to a phone number instantly.
- Identifying current and previous carrier information related to a phone number.
- Locating individuals tied to a phone number or address.
- Uncovering associates or critical information tied to an investigation.
- Returning up to 10 phone numbers per input via online or offline batch.

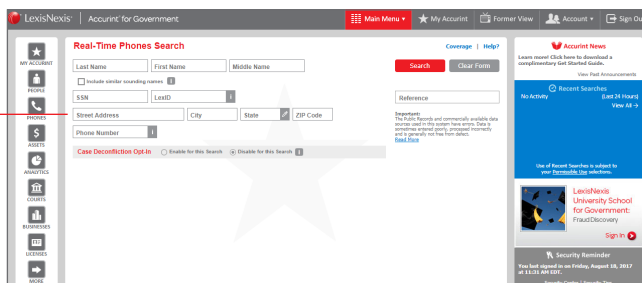

The Real-Time Phones Search allows users to search by a phone number, subject's name, address, unique identifier, Social Security number (SSN) or combination of the data. Results include names of individuals or businesses associated with the phone number, phone type, phone status, current and previous carrier details, porting and non-published indicators, and a summary of possible historical phone record information to give users a more comprehensive overview of the phone number for case investigations, including further detail that may be used in issuing subpoenas when necessary.

Results may include:

- **Subject name:** Individual or business name
- **Address:** Full or partial address
- **Phone number:** 7 or 10-digit phone numbers (10-digit phone number required for Phone Detail Report)
- **Carrier name:** Name of the telephone company or wireless provider
- **Carrier city and state:** General location of the telephone company or wireless provider
- **Dates:** First reported and last reported dates

The Real-Time Phones Search capability is available in the two locations highlighted above on the Main Menu page.

Search in-house and real-time phone sources for landline, wireless, VoIP and other phone number-related data.

Phone Detail Report	
Name:	JOHN DOE
